TasmaNet Home Office Internet services include an unlimited data allowance. Use of the service is subject to our Acceptable Use policy which can be accessed at www.tasmanet.com.au/legal. Contact us on 1300 792 711 for information about your service usage.

¹ SERVICE SPEED AND CONTENTION RATIOS

'Speed' refers to the maximum theoretical download and upload speeds that can be delivered over the nbn™ wholesale speed tier for each service. Speeds can be affected by factors within our control, such as the Contention Ratio of the service, and factors beyond our control, such as the content being downloaded by the end-user, your distance and the quality of the copper from the node or basement for FTTN and FTTP services, the location of your Wi-Fi router/modem, and the number of connected devices running through your router at the same time.

nbn™ Fixed Wireless Plus aims to deliver the maximum potential wholesale speed the network is capable of delivering at the time of use, however actual service speeds may be impacted by network congestion on the nbn™ Fixed Wireless network.

TasmaNet publishes the Contention Ratio for each nbn™ service we offer so that you can select a service that meets your expectations. The lower the ratio, the fewer subscribers share the connection bandwidth, reducing the likelihood that speeds will slow if many subscribers use data simultaneously.

² TasmaNet will not activate services on nbn™ wholesale speed tiers above those that nbn indicates are likely to be achieved over the customer's connection. TasmaNet will also provide remedies to customers not able to achieve expected service speeds, including the opportunity to move to an alternate service or to cancel the service within the minimum term without penalty.
