

TasmaNet Cloud Backup

→ Unlock easy and cost-effective off-site cloud Backup-as-a-Service

Take advantage of Service Provider Console to manage backups of your on-premise hardware, local virtual machines and workloads hosted in the public cloud.

The TasmaNet Veeam Cloud Backup enables off-site backup storage as part of a comprehensive availability strategy, embracing virtualisation and storage investments for customers in our data centre and extending them through the hybrid cloud.

→ Master the 3-2-1 backup challenge

Best practice 3-2-1 backup mandates three copies of data, stored on two types of media, with one copy secured off site.

TasmaNet Cloud Backup lets you achieve 3-2-1 security without putting money and resources into a second site or adding bandwidth

→ Protect any machine, anywhere

Customers can protect almost any operating system using the Veeam Agent - now available for; Windows, Mac, Linux, IBM AIX and Oracle Solaris.

As long as the machine has internet access it can now be protected from anywhere.

Product Overview

TasmaNet Cloud Backup suits businesses of all sizes looking to centralise the management of their backups and leverage secure off-site storage as part of a comprehensive data availability and security strategy

MASTER 3-2-1 BACKUP

Master off-site data backup challenges and secure your business with 3 copies, 2 media types, and 1 off-site data storage.

PROTECT YOUR DATA ANYWHERE

Manage on-premise hardware, locally hosted virtual infrastructure and public hosted cloud workloads from a single pane of glass

DIGITAL TRANSFORMATION

Use your protected data to migrate workloads into the CORE IaaS portal to easily transition into the cloud.

SECURE STORAGE

Single port connectivity via a secure, reliable TLS / SSL connection to a service provider with traffic encryption.

SELF-SERVICE SOLUTION

Access and recover your data anytime using Service Provider Console. Single pane of glass to manage all your backup tasks via the web based portal.

COST EFFECTIVE PROTECTION

Month on month billing. Save on maintaining your own off-site backup repository or adding bandwidth.
